

ZAXIS200 series Southeast Asia

APPLICATION & ATTACHMENT

Model Code	ZX200-5G	ZX210LC-5G	ZX210LCH-5G	ZX210F-5G Forest Machine	ZX210MF-5G Forest Machine
Engine Rated Power	125 kW (168 HP)	125 kW (168 HP)	125 kW (168 HP)	125 kW (168 HP)	125 kW (168 HP)
Bucket capacity (ISO Heaped)	0.80 m ³	0.80 m ³	0.80 m ³	0.91 m ³	0.91 m ³
Operating Weight	19 800 kg	20 400 kg	21 500 kg	22 200 kg	22 400 kg

ZAXIS Empower your Vision.

A ZAXIS hallmark – industry-leading hydraulic technologies, and performance no other can beat. New ZAXIS provides reliable solutions: impressive fuel economy, swift front movements, and easy operation. You'll also find Hitachi technological prowess and expertise, such as the optimized hydraulic system and engine.

New ZAXIS features the key benefits of high quality, low fuel consumption, and high durability, all of which serve to ensure low running costs.

New ZAXIS, which is empowered by comprehensive evolution, will realize customers' visions and dreams, and pioneer your colorful future.

More Production with Less Fuel

Page 4-5

- 9% reduction in fuel consumption
- More fuel reduction in the ECO mode
- Swift front movements with HIOS III hydraulics
- Powerful lifting operation
- Boosted swing torque
- Enhanced power boost

No Compromise on Operator Comfort

Min. ground clearance	450 mm	450 mm	450 mm	585 mm

Note: The photos in this brochure show excavators with optional equipments such as rear view camera.

More Production with Less Fuel

9% Reduction in Fuel Consumption

New ZAXIS is a fuel-thrifty excavator that can reduce fuel consumption by 9%*, compared to the conventional ZX200-3/ZX200-3F family, thanks to the HIOS III hydraulic system and engine control system, thereby reducing CO₂ emissions.

*5%, compared to the ZX200/ZX200-3G.

More Fuel Reduction in the ECO mode

The ECO mode, a new economical mode, can further cut fuel consumption by 9% compared to the PWR mode, without sacrificing digging speed by optimal matching of operations.

Swift Front Movements with HIOS* III Hydraulics

Operating speed increases with less fuel consumption thanks to the HIOS III hydraulic system, developed by industry-leading hydraulic technologies and a wealth of experience. Actuators work quickly by boom weight, without needing a regenerative circuit and pressure oil.

*Human & Intelligent Operation System

Rapid Arm Roll-in

Arm roll-in speed increases by combined flow from arm and boom cylinders through regenerative valves for productive excavation.

Fast Arm Speed During Boom Lowering

Arm speed increases by boom weight during boom lowering, without needing pressure oil from a pump. That is, arm circuit flow is increased for higher arm speed, allowing for quick loading of a dump truck and positioning of the front.

Powerful Lifting Operation

The Auto Power Lift mode, which automatically surge lifting force by 10% when needed, allows for powerful lifting of buried concrete pipes or sheathing sheets.

Boosted Swing Torque

Allows for powerful wall cutting with the bucket, and smooth swing operation on slope.

Enhanced Power Boost

The Power Boost mode allows the operator to surge 10% more digging force for powerful excavation by pressing its button on the control lever.

Pursuits of Performance and Durability

Prestige R&D and Quality Control

Hitachi has earned praise for technological prowess and product performance around the world. R&D Division has a track record – including excellent design, stress analysis expertise using CAE system, and abundant production data base. What’s more, a large-scale durability test field (427 hm²) allows for a series of stringent testing of new machines.

Production Division strives to automatize production processes, including robotic welding, machining, painting, assembling and transferring.

Computer-Aided Engineering

Main pump testing area

Mid-sized excavator assembly line

Main frame welding line

Simulation testing from operator seat

Durable, Reliable Engine

This engine has a track record showing impressive durability at countless tough job sites around the world.

The engine — associated with a rugged design, a direct fuel injection system and an elaborate governor — goes green, and complies with EU Stage II and US EPA Tier 2 emissions regulations.

The cooling system well keeps the engine cool. The engine cover has a wider air suction area, and radiators are arranged in parallel for efficient cooling. This parallel arrangement also facilitates their cleaning.

The ample-capacity intercooler and turbocharger help yield a whopping 125 kW (168 HP) output for higher production in shorter job schedule.

Rock-Solid, Durable Front Attachment

The boom top and foot are reinforced with thickened high-tensile steel brackets, which incorporate steel bushings to enhance durability. Arm cylinder and boom cylinders (rod extend ends) cushion shocks at stroke ends to cut noise and extend service life.

Joint pins at the front attachment are tightly fit to reduce jolt and sound. The arm-bucket joint is protected by WC thermal spraying* on its contact surfaces to reduce wear and jolt. New-type HN bushings, utilized on joint pins, retain grease inside for longer greasing intervals. A reinforced resin thrust plate, mounted on the bucket pin, helps reduce wearing noise.

*Not provided forest machine

Strengthened Undercarriage

The X-beam frame is made monolithically with fewer welds for higher rigidity and durability. Track adjusters absorb impacts to crawlers. Front idlers and adjuster cylinders are integrated to increase durability. Idler brackets and travel motor brackets are both thickened for added durability.

Proven Upperstructure

The upperstructure frame is reinforced with the proven D-section skirt to increase rigidity against damage by obstacles. A large door catch is added to reduce shocks and jolts of the cab and upperstructure.

Electroplated for High Corrosion Protection

The cab and body are painted by electrodeposition coating (ED), which is immersion coating by electrolysis. This is especially effective at corrosion-prone areas, such as flat surfaces, edges and boxes, for high corrosion resistance. The refined ED process leaves no spatter marks, as occurs with spray paint, giving a smooth mark-free surface.

The Rugged Undercarriage Boasts Mobility

The new ZAXIS is fitted with wide 800 mm shoes to lower ground pressure greatly, achieving powerful travel on wetlands. (Only forest machine) The forest machine ZX210MF-5G has a larger ground clearance and wider track gauge to give space free from collision with stumps and other obstructions.

X-beam frame

HN bushing

Track adjuster

Reinforced resin thrust plates

WC thermal spraying

Boom foot

No Compromise on Operator Comfort

Comfortable Operating Environment

You'll feel comfortable and confident, with plenty of leg space and excellent visibility when operating the cab. The new compact console gives more leg space. The new door pillar is shifted rearward by 70 mm to widen an entry space for easy access. A new LED room light, interlocked with the door, turns on when the door opens. The front window is easily removed and stored overhead using slide rails. The overhead window is openable for ventilation. Ample air conditioner vents are located strategically for uniform air circulation inside the cab. The control panel and control levers are arranged within easy reach of the operator. AM/FM radio and AUX port (optional) for a mobile music player are available for a long work day with less fatigue. All these designs focus on operator comfort.

Comfort-Designed Operator Seat

The luxury cloth seat is fitted with a headrest and arm rests for operator comfort. The seat can be adjusted in multiple ways, sliding and reclining, to suit operator's size and preferences. The seat can slide rearward by 40 mm more for added leg space. An air suspension with a heat pad is optional.

Robust Cab

The robust cab, meeting the OPG (Top Guard Level 1), protects the operator from falling objects. The pilot control shut-off lever is provided with a neutral engine start system that permits engine starting only when the pilot control shut-off lever is in Lock position.

Control panel

Large storage space

New, Easy-to-Use Multifunction Monitor

The new multi-language, multifunction monitoring system comprises a 7-inch high-resolution color monitor and a multifunction controller. The monitor allows the operator to check varying operating variables: hydraulic oil temperature, fuel level, work mode, full-auto air conditioner, AM/FM radio, rear view monitor camera (optional), maintenance support, and attachment flow adjustment. Menu items can be selected and adjusted by a multifunction controller on the control panel. A new rear view monitor camera always displays the view behind the machine.

The image shows a 7-inch color monitor displaying various operating variables. The top section shows 'A/I EGO' with a fuel level indicator at 50.0% and a time of 10:00. Below this are two analog gauges for hydraulic oil temperature and fuel level. The bottom section shows a rear view camera feed with a temperature of 24.0°C and a radio frequency of FM107.00. To the right of the monitor, a menu structure is shown with three levels: 'Main menu' (Main Menu, Alarm Exit, Air Conditioner, Radio, Work Mode, Testing Menu), 'Work mode' (Bucket, Breaker 1, Pulverizer 1, Crusher 1, Grapple 1), and 'Engine oil' (Previous Maintenance: 2000/01/01 0.0h, Remarks: 496.1h, Maintenance Interval: 500.0h).

Simplified Maintenance

One-touch Openable Upper Cover

Dust-Proof Indoor Net

A dust-proof indoor net, provided at the front of radiator, can be easily removed and cleaned with compressed air. At the rear of the radiator, air blowing can be done through a one-touch open cover. The air condenser is openable for easy cleaning at its rear.

Attractive, Robust Body

Side frame tops of the undercarriage are sloped to let muck slide away. Track adjuster greasing ports are repositioned for easier lubrication, and well protected from muck packing.

Grouped Remote Inspection Points

Service points are concentrated inside left and right covers that are readily accessible from ground level for convenient servicing and inspection, including water draining from the fuel tank, replenishment of coolant, and replacement of filters. The fuel tank is anti-corrosion coated on its inside, and has a large cleaning port at the bottom. These wise designs effectively keep fuel clean, and ease servicing. Handrails are provided at convenient locations for easy riding on the upperstructure. Plenty slip-resistant plates are located for safe maintenance.

Grouped remote filters and inspection points

Utility space and radiators

Fuel tank water drainage cock

The photo shows an excavator with an optional front glass lower guard.

Low Life Cycle Costs

Service intervals are long enough to slash maintenance costs.

Note: Periodic inspection is required to check oil contamination and such.

Reliable Solutions, with Various Options

Easy-to-Use Attachments

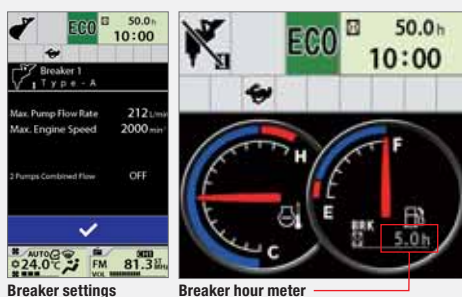

The operator can change over valves, adjust extra circuit flow, and check settings from the multifunctional monitor next to the operator seat. What's more, 11 jobs, including flow rate setting, can easily be selected by their identified names.

Easy-to-Operate Breaker

When using a breaker that requires frequent change of hydraulic oil and filters, an extra hour meter on the multifunctional monitor displays operating hours of the breaker, suggesting adequate replacement timing of oil and filters. The Breaker Alarm (optional) displays an alert mark on the monitor screen, and sounds when the breaker works continuously over one minute.

Varied Jobs, Varied Options

Lower cab front guard is provided for protection against debris during demolition and breaker operation. High-performance filters and in-line filters are available at tough job sites.

Breaker settings

Hitachi Support Chain

Hitachi Support Chain is a full customer support system offered after buying a Hitachi machine.

Remote Fleet Management with Global e-Service

Easy Access to On-Site Machines through the Internet

This on-line fleet management system allows you to access each on-site machine from a PC in your office. You can get its operating information and location to increase productivity of the fleet and reduce downtime. Operating data and log are sent to a Hitachi server for processing, and then to customer and dealers around the world. This system is available 24 hours a day, all the year around.

Note: In Some Regions, Global e-Service Is Not Available by Local Regulations.

Main Features of Global e-Service

Functions

Global e-Service provides easy access to a machine on site, conveying operating information and log, including daily operating hours, fuel level, temperatures, pressures, and likes.

Maintenance

Maintenance data and log are displayed on a easy-to-read monitor screen, suggesting recommended maintenance for efficient fleet management.

Parts and Service

Hitachi full customer support is available every area on the globe for full customer satisfaction through Hitachi local dealers.

Parts

Hitachi Global Online Network, a parts supply system, is linked with Japan Parts Center, overseas depots and over 150 dealers abroad to deliver on-line parts information, including in-stock parts, order receptions, shipments and delivery period of over one million parts and components.

Genuine Hitachi Parts

Genuine Hitachi parts, meeting Hitachi stringent quality standards, are guaranteed according to Hitachi warranty standards. The use of genuine Hitachi parts, including engine, fuel, hydraulic oil and filters, may slash running costs, and extend machine life.

Ground Engaging Tools (GETs)

Hitachi provides an array of Hitachi Ground Engaging Tools developed and built for a variety of applications. Using high-

quality, well-maintained GETs will help you get customers' trust.

Note: Some dealers do not handle Hitachi GETs.

Remanufactured Components

Hitachi components are remanufactured according to the stringent remanufacturing standards at four factories around the world. They have high quality equivalent to new ones, and backed up by Hitachi warranty system.

Note: Some dealers do not handle Hitachi Remanufactured Components.

Service

Extended Warranty – HELP

Hitachi Standard Warranty System is available on all new Hitachi machines. In addition, Hitachi offers Hitachi Extended Life Programs (HELPS) to suit customer expectations –

protecting machines under tough operating conditions, avoiding unexpected downtime, and reducing repair costs.

Note: Warranty conditions vary by equipment.

Diagnostic Tools — Maintenance Pro

Electronic control system needs quick on-site solutions, apart from mechanical repairs. Hitachi's Maintenance Pro can diagnose machine failures in a short time by plugging a PC into a failed machine.

Technical Training

On-site servicing matters despite locations to keep the machine at peak performance and reduce downtime. Technical Training Center (TTC), located in Japan, educates and trains service technicians and service support personnel coming from Hitachi dealers and factories on the globe according to the international training programs.

- Notes: 1. Ratings are based on ISO 10567.
 2. Lifting capacity does not exceed 75% of tipping load with the machine on firm, level ground or 87% full hydraulic capacity.
 3. The load point is the center-line of the bucket pivot mounting pin on the arm.
 4. *Indicates load limited by hydraulic capacity.
 5. 0 m = Ground.

A: Load radius
 B: Load point height
 C: Lifting capacity

For lifting capacities, subtract bucket and quick hitch weight from lifting capacities without bucket.

○ : Optional equipment

	ZX200-5G / ZX210LC-5G	ZX210LCH-5G	ZX210F-5G ZX210MF-5G
ENGINE			
Air cleaner double filters	●	●	●
Auto idle system	●	●	●
Cartridge-type engine oil filter	●	●	●
Cartridge-type fuel pre-filter	●	●	●
Cartridge-type fuel main filter	●	●	●
Dry-type air filter with evacuator valve (with air filter restriction indicator)	●	●	●
Dust-Proof indoor net	●	●	●
ECO/PWR mode control	●	●	●
Engine warm-up device	●	●	●
Fan guard	●	●	●
Radiator reserve tank	●	●	●
Water separator	●	●	●
50 A alternator	●	●	●

HYDRAULIC SYSTEM			
Auto power lift	●	●	●
Control valve with main relief valve	●	●	●
Full-flow filter	●	●	●
High mesh full flow filter with restriction indicator	○	○	—
One extra port for control valve	●	●	●
Pilot filter	●	●	●
Power boost	●	●	●
Suction filter	●	●	●
Work mode selector	●	●	●

CAB			
All-weather sound suppressed steel cab	●	●	●
AM-FM radio with 2 speaker	●	●	●
Ashtray	●	●	●
Auto control air conditioner	●	●	○
AUX. terminal and storage	○	○	—
Cab (Center pillar reinforced structure)	●	●	●
Cab guard	—	—	●
Drink holder	●	●	●
Drink holder with hot & cool	●	●	○
Electric double horn	●	●	●
Engine shut-off lever	●	●	●
Evacuation hammer	●	●	●
Floor mat	●	●	●
Footrest	●	●	●
Front window washer	●	●	●
Front windows on upper, lower and left side can be opened	●	●	●
Glove compartment	●	●	●
Hot & cool box	●	●	○
Intermittent windshield wipers	●	●	●
Key cylinder light	●	●	●
LED room light with door courtesy	●	●	●

Lower cab front guard	○	●	—
OPG top guard Level I (ISO10262) compliant cab	●	●	●
Pilot control shut-off lever	●	●	●
Rear tray	●	●	●
Retractable seat belt	●	●	●
Rubber radio antenna	●	●	●
Seat : Fabric seat	●	—	●
Seat : Mechanical suspension seat	○	●	—
Seat adjustment part : backrest, armrest, height and angle, slide forward / back	●	●	●
Short wrist control levers	●	●	●
Upper cab front guard	○	○	—
4 fluid-filled elastic mounts	●	●	●
24V cigarette lighter	●	●	●

MONITOR SYSTEM			
Alarm buzzers: overheat, engine oil pressure	●	●	●
Alarms: overheat, engine warning, engine oil pressure, alternator, minimum fuel level, hydraulic filter restriction, air filter restriction, work mode, etc	●	●	●
Display of meters: work mode, auto-idle, glow, operating conditions, etc	●	●	●
Display of meters: rearview monitor	●	●	—
32 languages selection	●	●	●

LIGHTS			
Additional cab roof front lights	○	○	—
Additional boom light with cover	○	○	—
2 working lights	●	●	●

UPPER STRUCTURE			
Body guard (engine, fuel tank, door)	—	—	●
Fuel level float	●	●	●
Hydraulic oil level gauge	●	●	●
Rear view camera	●	○	—
Rear view mirror (right & left side)	●	●	●
Side bumper & cab guard bracket	—	—	●
Swing parking brake	●	●	●
Tool box	●	●	●
Tropical cover	●	●	●
Undercover	●	●	—
6.0 mm reinforced undercover	○	○	—
Utility space	●	●	●
4 200 kg counterweight	●	—	●
4 600 kg counterweight	○	●	—
5 400 kg counterweight	○	○	—
2 x 88 Ah batteries	●	●	●

FRONT ATTACHMENTS			
Centralized lubrication system	●	●	●
Dirt seal on all bucket pins	●	●	●
Fixed grapple	—	—	●
Flanged pin	●	●	●
HN bushing	●	●	●
Reinforced resin thrust plate	●	●	●
Link A	●	●	●
Weld link A	○	—	—
Link B	●	—	●
Reinforced Link B	—	●	—
WC (tungsten-carbide) thermal spraying	●	●	—
0.80 m³ bucket (ISO heaped)	●	● H-bucket	—
0.91 m³ bucket (ISO heaped)	○	—	○
0.91 m³ horn bucket (ISO heaped)	—	—	○
2.91 m arm	●	● H-arm	—
2.91 m reinforced arm (with grapple bucket)	—	—	●
5.68 m boom	●	—	—
5.68 m H-boom	—	●	●

ATTACHMENTS			
Attachment basic piping	○	○	—
Breaker and crusher piping	○	○	—
High mesh full flow filter with restriction indicator	○	○	—
Line filter	○	○	—
Parts for breaker and crusher	○	○	—
2 pump combined flow for attachment basic piping	○	○	—

MISCELLANEOUS			
Global e-Service	●	●	●
Onboard information controller	●	●	●
Lockable fuel refilling cap	●	●	●
Lockable machine covers	●	●	●
Skid-resistant tapes, plates and handrails	●	●	●
Standard tool kit	●	●	●
Travel direction mark on track frame	●	●	●

Built on the foundation of superb technological capabilities, Hitachi Construction Machinery is committed to providing leading-edge solutions and services to contribute as a reliable partner to the business of customers worldwide.

Hitachi Environmental Vision 2025

The Hitachi Group released the Environmental Vision 2025 to curb annual carbon dioxide emissions. The Group is committed to global production while reducing environmental impact in life cycles of all products, and realizing a sustainable society by tackling three goals — prevention of global warming, conservation of resources, and preservation of ecosystem.

Reducing Environmental Impact by New ZAXIS

Hitachi makes a green way to cut carbon emissions for global warming prevention according to LCA*. New ZAXIS utilizes lots of technological advances, including the new ECO mode, and Isochronous Control. Hitachi has long been committed to recycling of components, such as aluminum parts in radiators and oil cooler. Resin parts are marked for recycling.

*Life Cycle Assessment – ISO 14040

Before using a machine with a satellite communication system, please make sure that the satellite communication system complies with local regulations, safety standards and legal requirements. If not so, please make modifications accordingly.

These specifications are subject to change without notice.

Illustrations and photos show the standard models, and may or may not include optional equipment, accessories, and all standard equipment with some differences in color and features. Before use, read and understand the Operator's Manual for proper operation.
